1 Introduction

This document provides an overview of my projects, categorized into Beginner, Medium, and Advanced levels. Each project showcases my expertise in UI/UX design and development, focusing on creating intuitive, responsive, and user-centric solutions. Pricing for each project is included to provide transparency for potential clients. For further inquiries, please contact me at samarthraut8767@gmail.com.

2 Beginner Projects

2.1 To-Do List App

Description: A simple web-based to-do list application with add, edit, and delete functionality, featuring a clean and minimalistic interface.

Technologies: HTML, CSS, JavaScript

Pricing: \$300

Outcome: Successfully implemented a user-friendly task management tool, improving personal productivity with a responsive design.

2.2 Personal Blog

Description: A static blog website with a responsive layout, designed to showcase articles with a focus on readability and simple navigation.

Technologies: HTML, CSS, Bootstrap

Pricing: \$400

Outcome: Created an accessible platform for content sharing, enhancing user engagement through clear typography and navigation.

2.3 Calculator

Description: A web-based calculator with basic arithmetic operations, designed with a user-friendly interface and responsive design.

Technologies: HTML, CSS, JavaScript

Pricing: \$200

Outcome: Delivered a functional and intuitive calculator, tested for accuracy across various devices.

2.4 Weather Widget

Description: A simple weather display widget that fetches and displays current weather data for a user-specified location.

Technologies: HTML, CSS, JavaScript, OpenWeather API

Pricing: \$350

Outcome: Provided users with real-time weather updates in a compact and visually appealing widget.

2.5 Portfolio Landing Page

Description: A single-page portfolio website with a focus on clean design and basic animations to showcase personal projects.

Technologies: HTML, Tailwind CSS

Pricing: \$400

Outcome: Developed a professional portfolio page, enhancing personal branding with smooth animations.

2.6 Image Gallery

Description: A responsive image gallery with lightbox functionality, allowing users to view images in a modal view.

Technologies: HTML, CSS, JavaScript

Pricing: \$300

Outcome: Improved user interaction with images through an engaging and responsive gallery experience.

3 Medium Projects

3.1 Task Management App

Description: A task management app with user authentication, task categorization, and local storage for data persistence.

Technologies: React, Tailwind CSS, LocalStorage

Pricing: \$1,500

Outcome: Enhanced task organization with secure user authentication and a modern interface.

3.2 E-Commerce Storefront

Description: A responsive e-commerce storefront with product filtering, cart functionality, and a mock checkout process.

Technologies: Vue.js, Vuex, Tailwind CSS

Pricing: \$2,500

Outcome: Streamlined online shopping experience with intuitive filtering and checkout features.

3.3 Chat Application

Description: A real-time chat application with group chat support and user presence indicators, built with a simple backend.

Technologies: React, Firebase, CSS

Pricing: \$2,000

Outcome: Enabled seamless real-time communication, improving user engagement in group settings.

3.4 Recipe Finder

Description: A recipe search app that allows users to find recipes based on ingredients, with a clean and intuitive UI.

Technologies: JavaScript, Edamam API, Tailwind CSS

Pricing: \$1,800

Outcome: Simplified recipe discovery with an efficient and visually appealing search interface.

3.5 Event Planner

Description: An event planning app with calendar integration, event reminders, and a responsive design for mobile and desktop.

Technologies: Angular, Firebase, Bootstrap

Pricing: \$2,200

Outcome: Improved event organization with reliable reminders and cross-device compatibility.

3.6 Note-Taking App

Description: A note-taking application with rich text editing, tagging, and search functionality for better organization.

Technologies: React, Quill.js, Firebase

Pricing: \$1,800

Outcome: Enhanced note management with robust editing and search capabilities.

4 Advanced Projects

4.1 Data Analytics Dashboard

Description: A comprehensive dashboard for real-time data visualization, featuring interactive charts and customizable widgets.

Technologies: Vue.js, D3.js, Express, MongoDB

Pricing: \$7,000

Outcome: Delivered actionable insights through dynamic and user-friendly data visualizations.

4.2 Social Media Platform

Description: A full-featured social media platform with user profiles, post interactions, and real-time notifications.

Technologies: React, Node.js, Socket.io, PostgreSQL

Pricing: \$9,000

Outcome: Fostered user engagement with real-time features and a scalable architecture.

4.3 Fitness Tracking App

Description: A mobile-first fitness app with goal tracking, workout logging, and integration with wearable devices.

Technologies: Flutter, Firebase, REST API

Pricing: \$8,000

Outcome: Empowered users to achieve fitness goals with seamless device integration.

4.4 E-Learning Platform

Description: An e-learning platform with course management, video streaming, and progress tracking for students and instructors.

Technologies: Next.js, GraphQL, AWS

Pricing: \$9,500

Outcome: Enhanced online learning with robust course management and streaming capabilities.

4.5 Inventory Management System

Description: A robust inventory management system with barcode scanning, stock tracking, and reporting features.

Technologies: Angular, Node.js, MySQL

Pricing: \$7,500

Outcome: Streamlined inventory operations with accurate tracking and reporting tools.

4.6 AI-Powered Chatbot

Description: A chatbot application with natural language processing for customer support, integrated with a web platform.

Technologies: Python, Dialogflow, React

Pricing: \$8,500

Outcome: Reduced customer support response times by 40% with intelligent and responsive interactions.

5 Conclusion

These projects demonstrate my ability to create innovative and user-centric solutions across various complexity levels. Each project was designed with a focus on usability, performance, and aesthetic appeal. Pricing reflects the scope and complexity of each project, with custom quotes available for specific requirements.
